Summary

Detail-oriented Front-End Developer with a strong foundation in Full-Stack development, specializing in building responsive and scalable web applications. Proven ability to deliver end-to-end solutions using Next.js, TypeScript, and modern UI frameworks. Experienced in integrating RESTful APIs and optimizing performance, with a passion for clean code and continuous learning.

Skills

HTML5, CSS3, JavaScript (ES6+), TypeScript, Bootstrap, Tailwind CSS, Shadcn/UI, React.js, Next.js, SCSS, Responsive Design (Flexbox & Grid), Framer Motion (Animations), Node.js, Express.js, Front-End Development, Full-Stack Fundamentals, Web Applications, Detail-oriented, Passionate about clean code, Performance optimization, Continuously learning

Experience

Route Academy,

Front-End Developer

- Optimized API response time by 30-40% and automated data processing, reducing manual handling by 50%.
- Developed a full-stack CRM system for 100+ users, improving performance by 30-40% and reducing manual data management by 50%.
- Integrated RESTful APIs with Axios, improving response time by 35% and reducing manual data management by 50%.
- Optimized database queries and restructured API endpoints using Node.js/Express, improving response time by 35% and handling 100+ records.
- Acquired foundational knowledge of backend concepts and API integration workflows, contributing to a more holistic understanding of web development.

Route Academy,

Back-End Developer

- Developed and maintained scalable backend services using Node.js and Express.js.
- Designed and implemented RESTful APIs to support front-end applications and ensure efficient data flow.
- Built and managed databases using MongoDB / MySQL, including schema design and query optimization.
- Implemented authentication & authorization (JWT / Sessions) to secure application endpoints.
- Performed CRUD operations and handled data validation and error handling.

Whispyr Real Estate, January 2026 - March 2026

Full Stack Developer

- Developed and maintained a full-stack CRM system for managing real estate operations.
- Built APIs and handled database architecture using MongoDB & Express.js.
- Collaborated on delivering a scalable and efficient system for client and property management.

Education

Arab Open University, January 2018 - December 2023

Bachelor of Computer Science

Projects

Portfolio Website

Designed and developed a personal portfolio to showcase projects and technical skills. Implemented animations and interactive elements for improved user experience. Built using Next.js, Tailwind CSS, and TypeScript with full responsiveness.

Recipe App 🍳

Built a dynamic recipe application using React.js and Fetch API. Implemented search functionality and dynamic rendering. Designed a responsive UI using reusable components.

FreshCart E-Commerce Platform

Developed a scalable e-commerce application using Next.js and TypeScript, improving page load speed by ~40% and reducing API response time from ~800ms to ~300ms through query optimization and caching. Enhanced the checkout user experience, leading to a ~25% increase in checkout completion rate and successfully managing 100+ products with stable performance.

SmartHome

Graduation Project: Smart Home System

Grade: Excellent, utilizing Arduino language C for hardware and software development.

CRM System

Whispyr Real Estate 🏡

Developed a full-stack CRM system for a real estate company to manage clients, properties, and sales operations. Built a scalable web application using Node.js, Express.js, MongoDB, and React.js / Next.js. Implemented authentication & authorization to manage user roles and secure access. Designed and developed RESTful APIs for handling client data, property listings, and transactions. Created an interactive dashboard for tracking leads, deals, and business performance. Applied CRUD operations and optimized data flow between front-end and back-end. Ensured responsive and user-friendly UI for better user experience.
